Dear Colleagues,

Welcome to the American Academy of Neurology Consortium of Neurology Residents & Fellows!

The Consortium of Neurology Residents & Fellows (or CNRF) is the AAN’s chapter dedicated to the professional development and neurologic education for all trainees. If you are a neurology resident or fellow, you are automatically a member of CNRF. Our mission is to be indispensable to our members.

My name is Abhimanyu Mahajan and I will serve as the chair for the academic year 2017-2018. I would like to thank Dr. Scharf, our outgoing chair for an excellent year and look forward to his input as we proceed through a new year. I would also like to congratulate Dr. Gupta who will be the AAN CNRF chair for the 2018-2019 year.

As you navigate the trainee pages on the AAN website, you will find a multitude of useful resources for your journey through training and beyond.

I strongly urge you to explore our monthly Graduate Medical Education e-newsletter to learn of our activities for the year and ways to get involved!

Leadership

The AAN provides a multitude of leadership opportunities for trainees to develop into tomorrow’s leaders in neurology.

Advocacy

The AAN offers programs to learn public policy as it relates to advancing the field of neurology. Apply to the Palatucci Leadership Forum or learn about BrainPAC. We need your voice on the Hill!

Connect with social media/ Join us on Synapse

Find us on Facebook or LinkedIn and get the conversation started. Join the CNRF Synapse page and let your voice be heard by fellow neurology trainees! Here you can post a photo, ask questions, update us on your progress, and network as you prepare for the next big step in your career.

Finishing residency?

Keep an eye out for the Triannual resident survey this summer. Your insight and opinion about training is vital to improving the process.

It is an honor and a privilege to serve our resident and fellow community and I look forward to your voice and participation throughout the coming year. I look forward to seeing you at the AAN meeting in Los Angeles in April 21-28, 2018.

Please feel free to contact me with ideas and suggestions.

Sincerely,

Abhimanyu Mahajan
