The American Academy of Neurology (AAN) and American Headache Society are developing a standing work group to monitor and update the headache quality measurement set as needed over the next two years.

The Work Group will review the current measures to decide if they should be updated, retired, or reaffirmed, as well as draft new outcome measures where there are gaps in care. Draft measures will be discussed and finalized via a virtual meeting series. Applicants must be available to participate in a series of conference calls and 90 minute virtual meetings. Number of conference calls and virtual meetings, dates, and times will be based on the amount of material to review and work group member availability.

To be considered for the work group please complete the following and submit to Erin Lee at elee@aan.com by August 2, end of business:

• **AAN Nomination and Conflict of Interest Form** (All potential conflicts of interest are resolved in accordance with the AAN’s Policy on Conflicts of Interest as described in the 2014 AAN Measurement Manual)
• Current Curriculum Vitae (10-page maximum)
• A letter of interest highlighting quality improvement, guideline, quality measures, and/or leadership experience

Measure Development Work Group Responsibilities:

• Develop quality measures that address desired outcomes and gaps in care.
• Ensure quality measures are high quality, valid, and implementable.
• Develop supporting materials to assist providers in measure implementation.

Work Group members will:

• Provide timely responses to requests for information, reviews, or edits.
• Assist with the development of process and outcome quality measures.
• Attend virtual meeting series.
• Review and respond to public comments.
• Develop an executive summary manuscript for publication.
• Review measures approximately every 6 months to ensure relevancy and feasibility.

If you have any questions or concerns, please contact Erin Lee at 612-928-6020 or elee@aan.com. The work group leadership will review nominations and final decisions will be made in August. This work group will be smaller in size with roughly 8-10 members; not all who apply will be accepted.
