John F. Kurtzke, MD, FAAN Clinician-Scientist Development Three-Year Award in Multiple Sclerosis

Cosponsored by the American Academy of Neurology, the American Brain Foundation, and the Consortium of Multiple Sclerosis Centers
Also supported through Foundation of CMSC grants by Genetech and Genzyme, a Sanofi Company

Application Deadline: October 1, 2015

The American Academy of Neurology, the American Brain Foundation, and the Consortium of Multiple Sclerosis Centers are pleased to announce a three-year Clinician-Scientist Development Award to support a clinician scientist’s research related to multiple sclerosis. The award aims to recognize the importance of good clinical research and encourage young investigators in clinical studies.

The three-year award will consist of an annual salary of $75,000 plus $5,000 in educational expenses. Supplementation of the stipend with other grants or by the fellow institution is permissible, but fellows may not accept other fellowships, similar awards, or have another source of support for more than 50 percent of their research salary during the first year of the fellowship. If similar awards are obtained after completion of the first year of the fellowship, fellows are required to submit a revised budget for review or may need to forfeit the rest of the award. Only direct costs will be funded by this award.

MATERIALS FOR APPLICATION
Submit one complete set of the following application materials online at AAN.com/view/fellowships2016:

1. Letter of nomination from the chair of the department of neurology, including assurance that clinical service responsibilities will be restricted to no more than 20 percent of the fellow’s time.
2. Three-page research plan, including brief statements of aims, background, and the contemplated approaches to methodology and data. The research plan should be written by the applicant and should represent his/her original work. However, the applicant is expected and encouraged to develop this plan based on discussion with the proposed mentor. It is appropriate for the proposed work to be specifically related to the mentor’s ongoing research, but not required.
4. Two letters of reference supporting the applicant’s potential for a clinical, academic research career and qualifications for the fellowship. Letters of reference are in addition to the three-page research plan.
5. Listing of the applicant’s and mentor’s current and pending support, other than this fellowship, using NIH format.
6. Letter from proposed mentor detailing his/her support of and commitment to the applicant and the proposed research and training plan. The letter should specifically indicate the mentor’s role in the development and preparation of the applicant’s research plan. More than one mentor is permitted. One mentor should be designated as primary and be responsible for administrative issues. Letters should include:
   - How the proposed research fits into the mentor’s research program.
   - Expertise and experience in the area of research proposed and the nature of the mentor’s proposed time commitment to the supervision and training of the applicant.
   - Mentor’s prior experience in the supervision, training, and successful mentoring of clinician scientists.
   - Potential for applicant’s future research career and comparison of applicant amongst other residents.
7. Proposed mentor’s NIH Biosketch.
8. Document describing arrangements for formal course work including: quantitative clinical epidemiology, biostatistics, study design, data analysis, and ethics.

IMPORTANT NOTE REGARDING PHYSICIAN PAYMENT SUNSHINE ACT
The Physician Payment Sunshine Act (“PPSA”) requires pharmaceutical and device manufacturers (“Manufacturer”) to report to the Centers for Medicare and Medicaid Services (“CMS”) certain payments or transfers of value made to physicians, including payments made through third parties. The Clinical Research Training Fellowship (“CRTF”) you are applying for may be funded in whole or in part from a transfer of value made from a Manufacturer. By applying for a CRTF, you understand that if you are awarded the CRTF, the supporting Manufacturer may be required under the PPSA to report the following information to CMS: your First, Middle, and Last Names; Primary Business Address; Email Address; Physician Primary Type; National Provider Identifier (if applicable); Physician Specialty; and Physician License State and License Number (“Reporting Information”). If required, the Reporting Information will be included in the CMS report that is published on a publically available website. If requested by AAN, all recipients of CRTFs must provide Reporting Information to AAN within thirty days of AAN’s request. If required, AAN will provide Reporting Information to the applicable supporting Manufacturer, and that Manufacturer will provide CMS the Reporting Information along with additional information, including: Total Amount of Payment, Date of Payment, Form of Payment, and Nature of Payment. If you do not wish to be reported for accepting a CRTF, please do not apply.

HOW TO APPLY
2. Select ‘Clinician Scientist Development Award’
3. Select ‘John. F. Kurtzke, MD, FAAN Clinician-Scientist Development Three-Year Award’
4. Select ‘Apply now’

Please submit only one application. The review committee will consider your application for all of the applicable fellowships.

IMPORTANT DATES
October 1, 2015: Application deadline
January 2016: Notification of recipients
July 1, 2016: Funding begins

ELIGIBILITY
1. For the purpose of this fellowship, clinical research is defined as “patient-oriented research conducted with human subjects, or translational research specifically designed to develop treatments or enhance diagnosis of neurological disease. These areas of research include epidemiologic or behavioral studies, clinical trials, studies of disease mechanisms, the development of new technologies, and health services and outcomes research.” Disease related studies not directly involving humans or human issue are also encouraged if the primary goal is the development of therapies, diagnostic tests, or other tools to prevent or mitigate neurological diseases.
2. Applicant must be an AAN member interested in an academic career in clinical or translational research who has completed residency or a post doctoral fellowship (for a PhD) in a clinical discipline (medicine, nursing, psychology, neuropsychology) within the past five years. Basic science applicants must also hold a post doctoral degree in a clinical discipline. In addition to being a member of the AAN, the candidate must be undertaking research at an organization that is a member of the Consortium of Multiple Sclerosis Centers (CMSC). For a list of CMSC member institutions, please consult the CMSC website directory at “http://www.mscare.net” www.mscare.net or contact the organization at “http://www.mscare.net” www.mscare.net. Those early in their clinical training careers will be given priority.

EVALUATION AND SELECTION
Applications are evaluated by members of the Clinical Research Subcommittee, Translational Neuroscience Subcommittee, specifically appointed members of the CMSC Research Committee and various ad-hoc reviewers.
• Applicant's ability and promise as a clinician-scientist based on prior record of achievement and career plan, letters of reference, and curriculum vitae (30 percent)
• Quality and nature of the training to be provided and the institutional, departmental, and mentor-specific training environment (30 percent)
• Quality and originality of the research plan (40 percent)

ANNUAL AND FINAL PROGRESS REPORTS
An annual progress report is due in May of the first year. Renewal of the award in year two is contingent upon presentation of a satisfactory progress report. Additionally, a final research report and a final expenditure report are due within 60 days following the close of the grant term. The institution must prepare the final expenditure report.
