| Dementia / Behavioral Neurology Fellowship | University of California  
San Diego, CA  
www.adrc.ucsd.edu  
The Fellowship includes clinical assessment of patients with memory and other cognitive disorders, and exposure to clinical trials and research. Research opportunities at the Alzheimer's Disease Research Center and VA Medical Center include clinical topics, biomarkers, neuroimaging, clinical trials, and biology of disease, according to interests of applicant. | Board eligible/ certified.  
Must be eligible for a California Medical License  
Personal statement and letters of reference | 12-24 months | Douglas Galasko, MD  
Dept of Neurosciences, UCSD  
9500 Gilman Drive,  
La Jolla, CA 92039-0648  
Phone 858-246-1248  
dgalasko@ucsd.edu |
| Neurobehavior/ Dementia Fellowship     | University of California, Memory & Aging Center  
San Francisco, CA  
www.memory.ucsf.edu  
Their mission is to provide the highest quality of care for individuals with cognitive problems, to conduct research on causes and cures for degenerative brain diseases, and to educate health professionals, patients, and their families. |                                                     |                | Bruce Miller, MD, Program Director  
Memory and Aging Center  
Sandler Neurosciences Center  
675 Nelson Rising Lane, Suite 190  
San Francisco, California  
bmiller@memory.ucsf.edu |
| Geriatric Neurology Fellowship        | Quincy Medical Center  
Alzheimer’s Disease Center  
Quincy, MA  
Program designed to train physicians to become independent clinical researchers and to provide advanced clinical training in geriatric and behavioral neurology | MD degree or equivalent with USMLE certification | 24-36 months | Anil K. Nair, MD  
Fellowship Director,  
Alzheimer’s Disease Center  
114 Whitwell Street  
Quincy, MA 02169

| Clinical and Research Fellowship in Aging and Dementia | Washington University School of Medicine Knight Alzheimer’s Disease Research Center  
Knight ADRC Website: http://www.adrc.wustl.edu/  
Fellowship Overview: http://alzheimer.wustl.edu/Education/PDFs/ADR C%20Fellowship%20information.pdf  
The fellowship is designed to provide a foundation of knowledge on the basic and clinical science of dementia and neurodegeneration. This includes clinical training in the diagnosis, evaluation, and management of dementia, as well as didactic and experiential training in research methods and ethical conduct of clinical research. The experience is flexible to offer fellows whatever mix of clinical, translational, or bench work they wish to do. During the second year of fellowship, fellows will have gained sufficient experience to apply for a mentored career award and/or a clinical research training fellowship. By the end of this training program, fellows will be prepared to advance to an academic faculty position and pursue their careers as independent scientists in the field. | Graduates of ACGME-accredited training program in neurology or psychiatry, US citizen or permanent resident; US medical license.                                                                                       | 24 months       | Fellowship Director: John C.
